TOOLS REQUIRED

- ☐ Safety goggles
- ☐ Measuring tape
- ☐ 10 mm socket
- ☐ 10 mm ratchet wrench
- ☐ 13 mm ratchet wrench
- ☐ 15 mm ratchet wrench
- ☐ Ratchet wrench and extension
- ☐ Pliers
- ☐ Wire crimpers
- ☐ Wire stripper / cutter
- ☐ 3/16" Hex key wrench (allen wrench)
- ☐ Electrical tape
- ☐ Weather proof caulking (silicone sealer)
- ☐ 1/8" Drill bit
- ☐ 9/32" Drill bit
- ☐ Drill
- ☐ Heat Gun
- ☐ 6" Extension

REALTRUCK TECH SUPPORT 1-888-983-2204 (Press 2) Monday - Friday, 8:00 AM - 5:00 PM EST

Designed and manufactured by RealTruck AMP Research® • Made in Mexico
Patent Protected. Please see our product site for applicable patents. www.realtruck.com/b/amp-research/
© RealTruck Group, Inc., 2024 • Three-year limited warranty. • Professional installation is recommended.

INSTALLATION GUIDE

Attaching motor to Linkage assembly

The motors must be attached to the Linkage assemblies on step 5

EXPLODED VIEW

- Motor
- Socket cap screw
- Motor Linkage assembly
- Cinch Fastners

CAUTION: HANDLE WITH CARE.

To ensure our customers receive all components with full integrity, we pack the motors separate from their Linkage assemblies. This requires that the installer position and fasten the motor before continuing with the install. Please follow the instructions below and handle the assembly carefully.

CAUTION: Dropping the assembly or any excessive impact MAY cause damage to the motor.

Instructions:

1. Position the gear cover in place as shown if not already in place.
2. Seat motor into position on the three mounting bosses. This may require an adjustment of the gear by moving the swing arms.
3. After seating into place, fasten the motor with the three motor mount screws with 4mm Hex Head. Tighten screws to 36 in-lbs (4N-m). **Do not over torque.**

COMPONENT/PARTS IDENTIFICATION

Locate **Front Idler linkage** location. If plastic plugs are present remove plastic plugs to expose threads.

1

Pre thread supplied M10 flange bolt (13) and hook linkage (3) over bolt as shown. Once linkage is in position thread in rear linkage mounting bolt (13). Snug up bolts but do not torque.

2

Locate **Rear Drive linkage** location. If plastic plugs are present remove plastic plugs to expose threads.

Pre thread supplied M10 flange bolt (13) and hook linkage over bolt as shown. Once linkage (2) is in position thread in rear linkage mounting bolt. Snug up bolts but do not torque.

3

Install Running Board (1) to linkages.
Measure approx. 4.5" from back of linkage to tip of board.

In order to prevent binding follow the steps below.

Note: Hand cycle Boards between each step.

1. Tighten socket cap screws (10) with 3/16" Allen wrench (as shown on step 5). Torque to 10ft-lbs.
2. **Rear Linkage:** Tighten and torque Linkage upper mount bolt closest to pinch weld Torque to 30ft-lbs.
3. **Front Linkage:** Tighten and torque Linkage upper mount bolt closest to pinch weld. Torque to 30ft-lbs
4. **Rear Linkage:** Tighten and torque Linkage upper mount bolt closest to floor of cab. Torque to 30ft-lbs.
5. **Front Linkage:** Tighten and torque Linkage upper mount bolt closest to frame of truck. Torque to 30ft-lbs.
6. **Hand cycle boards to ensure no bind is present.**

4

5

REALTRUCK AMP RESEARCH POWERSTEP FORD RANGER

Route RGB wire to front linkage as shown. Use provided Extrusion wire clips (20) to hold wire in place.

6

Clean surface with alcohol and use provided adhesive backed wire clips (21) to hold wire on lower mount.

Note: Linkage pocket design vary.

7

Clean surface with alcohol and use provided adhesive backed wire clips (21) to hold wire on inner linkage as shown.

8

Connect RGB light plug into main harness of powerstep. Secure all remaining RGB wiring with supplied Zip ties (15). Cycle steps to ensure wiring is clear from any moving components of the powerstep.

Note: Linkage pocket design vary.

9

Install motor onto linkages using supplied Hex head bolts (18). Torque to 36in-lbs.

(See page 2 for motor install)

10

Remove Fuse from powerstep wire harness. Mount controllers using supplied zip ties (16) to harness in front of battery as shown. Connect positive leads from harness. Red to positive battery terminal and black to negative battery terminal.

11

Route the two wire harness legs down over to each wheel well. Long leg will run across to passenger side, short leg will run down to driver side. Ensure loom is free from steering and exhaust components. Secure with zip ties (15).

12

Remove floor mat and sill plate cover to expose floor below.

13

Locate hole forward of rubber plug. Approx location is in footwell area of cab. Use a 9/32" drill bit and drill thru floor. While drilling lift carpet to ensure drill bit does not damage carpet inside cab.

Insert provided grommet (17) and run trigger wire thru hole. Route wire towards kick panel area.

14

Locate the following wires (black connector) and connect the blue and white wires of the Powerstep Connection Module (6) with supplied Posi-Tap™ (12) to the following wire colors listed below.

Note: Disconnect both Grey and Black plug to allow easier access to wiring during tapping procedure.

Factory Can Wire	Powerstep Connection Module wire color
Green w/blue stripe	White
White w/green stripe	Blue

15

Use supplied Posi-Lock™ (11) connector to attach the the yellow wire of the OBD harness to the main harness. Lastly reinstall Factory OBD port removed in step 11. Plug in module (6) to OBD port on the vehicle. Reinstall sill plate removed from step 9.

16

Wire OBD II connector with Posi-Splice.

OBD II Connector located below steering column.

OBD II install: Use Supplied Posi-Lock™ connector to attach the Plug and Play Module to the Harness. Attach matching colors on the harness to the wires on the module. Plug in module to OBD II port on the vehicle. Secure harness with supplied tie wraps. **Note: If the OBD II pass thru harness (76404-01A) was purchased see install sheet supplied in packaging. The pass through harness allows for an open port for other accessories. See below for a brief description.**

REALTRUCK AMP RESEARCH POWERSTEP – FORD RANGER

On each side of the vehicle measure from the front edge of door line on the pinch weld to the specified lengths below. Measure at 16" for the front LED Light and 58" for the rear LED Light.

18

- Drill a 9/32" hole through the pinch weld at marked locations. Deburr all holes. After drilling apply paint to holes to prevent rusting.
- Insert grommet into drilled holes. Insert lamp wires through the grommets. (Silicon lube will help wires slip through grommets).
- Affix lamp to rocker panel surface. Make sure lamp is affixed to a flat, clean surface.

19

Using supplied butt connectors, connect the lamp wires. Red to Red, Black to Black. Once Crimped use heat gun to shrink tube. Close and wrap with conduit and electrical tape. Secure all loose wires with cable ties, with lamp wires pulled upward to avoid any wire snagging.

20

Insert plug from wire harness (4) onto motor (7). Slide rubber grommet on wire harness into slot of motor cover (8). Insert motor cover onto motor. Use electrical tape to cover any exposed wire from the motor. Insert plastic push pin rivets (14) in mounting holes of motor cover (8). Use pliers to ease installation.
NOTE: On 2 Door Bronco, tie up extra wires using supplied zip ties (15) to avoid wire snagging.

21

Reinstall Fuse. Check that all doors activate the Power Step and the LED Lights work when doors open and close. Reinstall any remaining trim panels.

FINAL SYSTEM CHECK

Check that all doors activate the PowerStep and the LED lights work when doors open and close.

NORMAL OPERATION: When the doors open, PowerStep automatically deploys from under the vehicle. When the doors are closed, PowerStep will automatically return to the stowed/retracted position.

Note that there is a 2-second delay before the PowerStep returns to the stowed/retracted position.

CORRECT OPERATION OF LIGHTS: All four lamps will illuminate upon opening any door of vehicle. Lamps will stay on until restowing of both Power Steps or until 5 minutes has expired with the doors open. When the lights timeout after 5 minutes, they can be reilluminated by closing and opening any door of vehicle.

Rev 05.30.24

Congratulations on your purchase of the genuine RealTruck / AMP Research PowerStep! Here's what you should know...

POWER-DEPLOYABLE RUNNING BOARDS OPERATION: RealTruck / AMP Research PowerStep running boards automatically move when the doors are opened to assist entering and exiting the vehicle.

Automatic power deploy:

The running boards will extend down and out when the doors are opened.

Automatic power stow:

The running boards will return to the stowed position when the doors are closed. There will be a 2-second delay before the running boards move to the stowed position.

Automatic stop:

If an object is in the way of the moving running board, the running board will automatically stop. To reset, clear any obstruction, then simply open and close the door to resume normal operation.

Manually set in the deployed (OUT) position for access to the roof:

The running boards can be manually set in the deployed position by firmly holding the step down with your foot while at the same time closing the door. To resume normal operation, open and close the door.

Maintenance: In adverse conditions, debris such as mud, dirt, and salt may become trapped in the running board mechanism, possibly leading to unwanted noise. If this occurs, manually set the running boards to the deployed position and flush the front and rear hinge arms with a high-pressure car wash wand. Avoid spraying the motors directly. After washing, apply silicone spray lubricant to the hinge pivot pins. Do not apply silicone, wax or protectants like Armor All® to the running board stepping surface.

Caution! Keep hands away when the running board is in motion.

5-YEAR LIMITED WARRANTY

RealTruck / AMP RESEARCH warrants this product to be free from defects in material and workmanship for FIVE (5) YEARS FROM DATE OF PURCHASE, provided there has been normal use and proper maintenance. This warranty applies to the original purchaser only. All remedies under this warranty are limited to the repair replacement of the product itself, or the repair or replacement of any component part thereof, found by the factory to be defective within the time period specified. The decision to repair or replace is wholly within the discretion of the manufacturer.

This warranty specifically excludes labor. If you have a warranty claim, first you must call our factory at the number below for instructions. You must retain proof of purchase and submit a copy with any items returned for warranty work. Upon completion of warranty work, if any, we will return the repaired or replaced item or items to you freight prepaid. Damage to our products caused by accidents, fire, vandalism, negligence, misinstallation, misuse, acts by nature or by defective parts not manufactured by us, is not covered under this warranty.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE CREATED HEREBY ARE LIMITED IN DURATION TO THE SAME DURATION AND SCOPE AS THE EXPRESS WRITTEN WARRANTY. OUR COMPANY SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

FOR WARRANTY ISSUES WITH THIS PRODUCT PLEASE CALL REALTRUCK TECH SUPPORT 1-888-983-2204

WARNING

Be sure to read and precisely follow the provided instructions when installing this product. Failure to do so could place the vehicle occupants in a potentially dangerous situation. After installing or reinstalling, re-check to insure that the product is properly installed.
