

APPLICATION

Ram 1500 Crew Cab
(Includes TRX Models)

YEAR MODEL

2019 - 2024

AMP Part

96240-01A

INSTALLATION GUIDE

INSTALLATION TIME

3-5 Hours

Professional installation recommended

SKILL LEVEL

4= Experienced

TOOLS REQUIRED

- ☐ Safety goggles
- ☐ Measuring tape
- ☐ 10 mm socket
- ☐ 13 mm socket
- ☐ 1/2" socket
- ☐ Ratchet wrench and extension
- ☐ Wire crimpers
- ☐ Wire stripper / cutter
- ☐ 3/16" hex key wrench (allen wrench)
- ☐ 4mm hex key wrench (allen wrench)
- ☐ Electrical tape
- ☐ Weather proof caulking (silicone sealer)
- ☐ Silicone spray

WARRANTY

5-Year Limited Warranty

REALTRUCK TECH SUPPORT 1-888-983-2204 (Press 2) Monday - Friday, 8:00 AM - 5:00 PM EST

Designed and manufactured by RealTruck AMP Research® • Made in Mexico
Patent Protected. Please see our product site for applicable patents. www.realtruck.com/b/amp-research/
© RealTruck Group, Inc., 2024 • Five-year limited warranty. • Professional installation is recommended.

EXPLODED VIEW

- Motor linkage
- Motor
- Delta PT screws

CAUTION: HANDLE WITH CARE.

To ensure our customers receive all components with full integrity, we pack the motors separate from their linkage assemblies. This requires that the installer position and fasten the motor before continuing with the install. Please follow the instructions below and handle the assembly carefully.

CAUTION: Dropping the assembly or any excessive impact MAY cause damage to the motor.

Instructions:

1. Position the gear cover in place as shown if not already in place.
2. Seat motor into position on the three mounting bosses. This may require an adjustment of the gear by moving the swing arms.
3. After seating into place, fasten the motor with the three motor mount screws with 4mm Hex Head. Tighten screws to 36 in-lbs (4N-m). **Do not over torque.**

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

Excludes TRX Models. On driver's side of vehicle towards front of body, remove harness bracket with 10mm socket or wrench. Remove plug from bracket, and replace with supplied bracket using two of the three factory screws as shown. Do not attach plug on to new bracket until motor is installed on to linkage (step 3).

1

Locate mounting points. First and last set of studs on the inner sill. Motor linkage mounts towards the front of the truck and Idler towards the rear. Driver side shown below.

Note: Studs may have excess paint buildup. We recommend using a wire wheel or thread repairing dies to clean excess paint buildup.

2

Attach motor to linkage. See page 2 for torque specs. Driver side motor orientation shown.

3

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

Mount drive and Idler linkage assemblies using supplied conical washer nuts (11) use a 13mm socket or wrench to tighten. Repeat for passenger side. Make sure linkages sit square, fully resting on studs before tightening.

Torque to 16ft-lbs (22Nm).

Note: On Drive Linkage, install nut closest to gear case first for ease of installation

Rear Idler Linkage

Front Driver Linkage

4

Using a 3/16" Allen install running board to linkages. Slide the front mounting T-nut into position, place the board(1) about 7 1/2 inches from the front edge of the front door. Use fasteners(9) to attach boards, finger tighten only. Align the rear T-nut and bolt it to the rear linkage. Then tighten all 4 fasteners to 10 ft-lbs.

5

Front of vehicle
← Driver side shown

Driver Front Door

7 1/2"

Torque to 10 ft.lbs.

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

Route RGB wire to front linkage as shown. Use provided Extrusion wire clips (21) to hold wire in place.

6

Clean surface with alcohol and use provided adhesive backed wire clips (20) to hold wire on lower mount.

7

Clean surface with alcohol and use provided adhesive backed wire clips (20) to hold wire on inner linkage as shown.

8

Connect RGB light plug into main harness of powerstep. Secure all remaining RGB wiring with supplied Zip ties (15). Cycle steps to ensure wiring is clear from any moving components of the powerstep.

9

Attach wire harness to controllers (make sure connector locking tabs fully engage). Mount controllers (6 & 19) with the two 11" cable ties each (13) to factory conduit, just rearward of battery.

Remove fuses from Power Step Wire Harness.

10

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

Connect red and black power leads to battery. Red lead goes to positive.

Secure with cable ties(12).

11

Route shorter leg of harness down Driver-side wheel well and longer leg of harness across firewall and down along passenger side wheel well. Attach wire harness with supplied 7" cable ties (12).

12

Locate the rubber boot to the left of the steering column. Poke hole to fish trigger wires thru.

13

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

Plug OBD II (8) to port, tuck wires up and away to prevent snagging when entering and exiting the vehicle.

14

Locate side access cover of dash and remove to gain better access to 2 pin plug for OBD harness installation.

15

Locate green block of plugs. And plug 2 pin connector from module into this port.

Note: To remove 2 pin connector (if needed) once plugged in, use a tool to push down clip as shown below.

16

Note: It's best to reach from both sides when installing 2 pin plug. Any open port on green plug can be used.

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

OBD II install: Use Supplied Posi Lock connector to attach the Plug and Play Module to the Harness. Attach matching colors on the harness to the wires on the module. Plug in module to OBD II port on the vehicle. Secure harness with supplied tie wraps.

Note: If the OBD II pass thru harness (76404-01A) was purchased see install sheet supplied in packaging. The pass through harness allows for an open port for other accessories. See next page for a brief description.

OBD II Connector located below steering column.

REALTRUCK AMP RESEARCH POWERSTEP - DODGE RAM

On driver side, run Wire Harness leg down and along underside of the vehicle floor and frame to front Drive Linkage. Connect harness to motor and secure harness with tie wraps. Route remainder of wire harness towards rear linkage assembly for LED lights.

18

On Passenger Side, run Wire Harness leg down and along underside of the vehicle floor and frame to front Drive Linkage. Connect harness to motor and secure harness with tie wraps. Route remainder of wire harness towards rear linkage assembly for LED lights

19

On each side of the vehicle measure approx. 7" back from front linkage and 8" forward of the rear linkage. Pre drill using an 1/8" drill bit and final drill to 9/32" thru pinch weld at marked locations. Insert grommet into drilled holes. Insert lamp wires through the grommets. (Silicon lube will help wires slip through grommets.) Affix lamp to rocker panel surface. Make sure lamp is affixed to a flat, clean surface.

Corrosion Protection Paint

20

Using supplied butt connectors (14) connect the lamp wires. Red to Red, Black to Black. Once Crimped use heat gun to shrink tube. Close and wrap conduit with electrical tape. Secure all loose wires with cable ties. Pull lamp wires upward to avoid any wire snagging.

21

Reinstall Fuses and check that all doors activate the Power Step and the LED Lights work when doors open and close. Reinstall any remaining trim panels. **NOTE: Verify front linkage clearance at Frame mounted Vibration Dampener. If linkage contacts Dampener in stowed position loosen bolt at pivot point and rotate up to provide at least 1/2" clearance.**

FINAL SYSTEM CHECK

Check that all doors activate the PowerStep and the LED lights work when doors open and close.

NORMAL OPERATION: When the doors open, PowerStep automatically deploys from under the vehicle. When the doors are closed, PowerStep will automatically return to the stowed/retracted position. **Note that there is a 2-second delay before the PowerStep returns to the stowed/retracted position.**

CORRECT OPERATION OF LIGHTS: All four lamps will illuminate upon opening any door of vehicle. Lamps will stay on until restowing of both Power Steps or until 5 minutes has expired with the doors open. When the lights timeout after 5 minutes, they can be reilluminated by closing and opening any door of vehicle.

Rev 05.30.24

Congratulations on your purchase of the genuine RealTruck / AMP Research PowerStep!
Here's what you should know...

POWER-DEPLOYABLE RUNNING BOARDS OPERATION: RealTruck / AMP Research PowerStep running boards automatically move when the doors are opened to assist entering and exiting the vehicle.

Automatic power deploy:

The running boards will extend down and out when the doors are opened.

Automatic power stow:

The running boards will return to the stowed position when the doors are closed. There will be a 2-second delay before the running boards move to the stowed position.

Automatic stop:

If an object is in the way of the moving running board, the running board will automatically stop. To reset, clear any obstruction, then simply open and close the door to resume normal operation.

Manually set in the deployed (OUT) position for access to the roof:

The running boards can be manually set in the deployed position by firmly holding the step down with your foot while at the same time closing the door. To resume normal operation, open and close the door.

Maintenance: In adverse conditions, debris such as mud, dirt, and salt may become trapped in the running board mechanism, possibly leading to unwanted noise. If this occurs, manually set the running boards to the deployed position and flush the front and rear hinge arms with a high-pressure car wash wand. Avoid spraying the motors directly. After washing, apply silicone spray lubricant to the hinge pivot pins. Do not apply silicone, wax or protectants like Armor All® to the running board stepping surface.

Caution! Keep hands away when the running board is in motion.

5-YEAR LIMITED WARRANTY

RealTruck / AMP RESEARCH warrants this product to be free from defects in material and workmanship for FIVE (5) YEARS FROM DATE OF PURCHASE, provided there has been normal use and proper maintenance. This warranty applies to the original purchaser only. All remedies under this warranty are limited to the repair replacement of the product itself, or the repair or replacement of any component part thereof, found by the factory to be defective within the time period specified. The decision to repair or replace is wholly within the discretion of the manufacturer.

This warranty specifically excludes labor. If you have a warranty claim, first you must call our factory at the number below for instructions. You must retain proof of purchase and submit a copy with any items returned for warranty work. Upon completion of warranty work, if any, we will return the repaired or replaced item or items to you freight prepaid. Damage to our products caused by accidents, fire, vandalism, negligence, misinstallation, misuse, acts by nature or by defective parts not manufactured by us, is not covered under this warranty.

ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE CREATED HEREBY ARE LIMITED IN DURATION TO THE SAME DURATION AND SCOPE AS THE EXPRESS WRITTEN WARRANTY. OUR COMPANY SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGE.

Some states do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.
